

# Nexign Instant BSS

A pre-integrated out-of-the box BSS solution for a quick start and easy extension of mobile business

Designed for fast and simple deployment, Nexign Instant BSS facilitates the launch of new business lines for mid-sized communication providers and MVNO, accelerating project delivery lifecycle and reducing time to market to just four months.

## Easy Start

Four months to start a new business

Simple three-step project plan

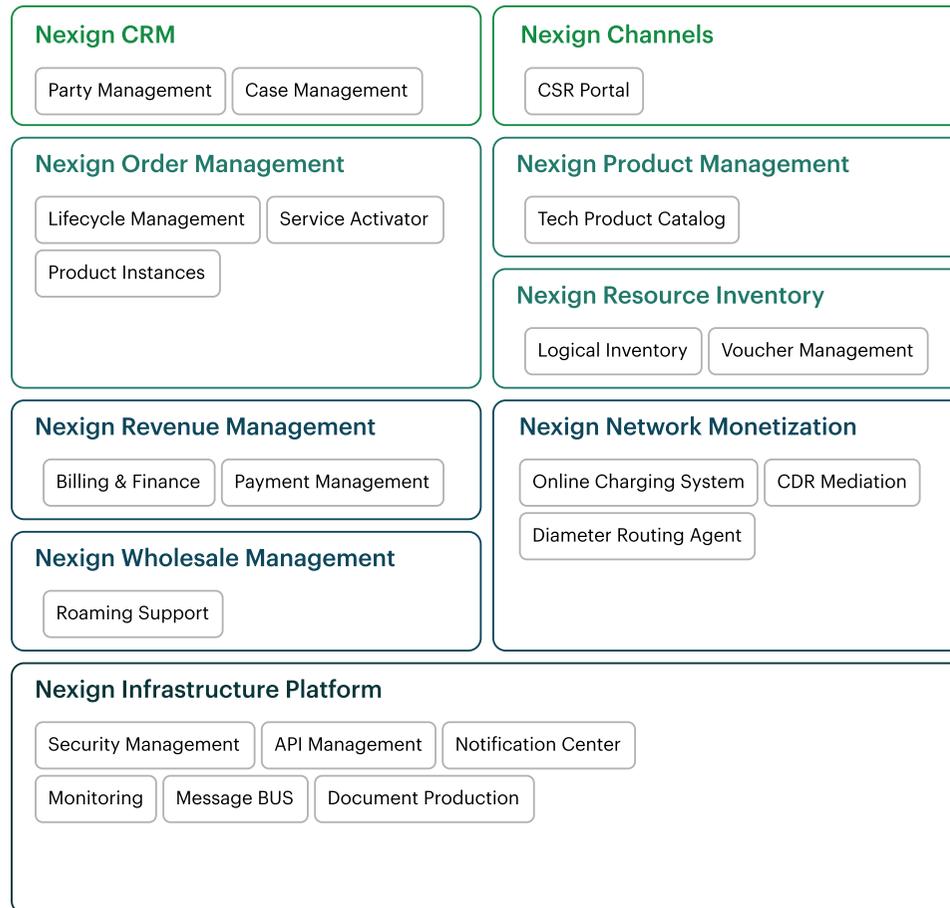

Progressive scale-up of business models

# Nexign Instant BSS Functional Scope

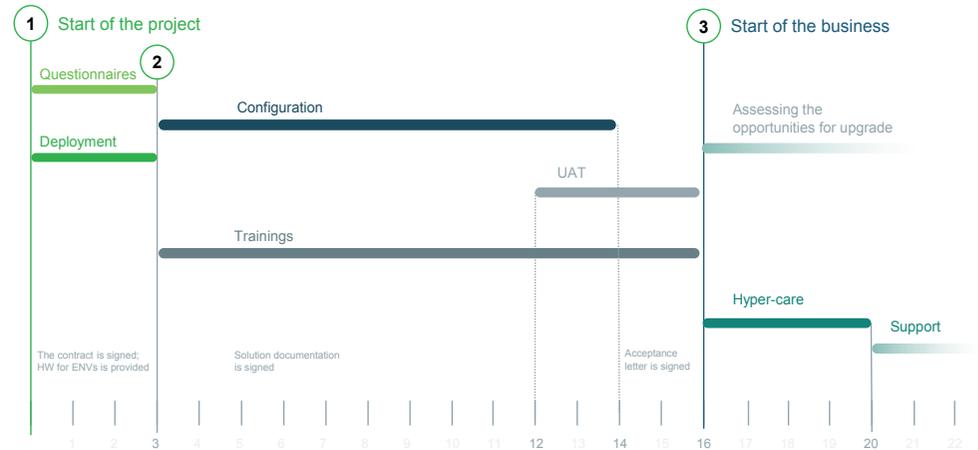

Nexign Instant BSS significantly reduces the decision-making process by providing CSPs with a full understanding of the project scope, results and calendar.

A well-defined solution scope incorporates a BSS stack covering mobile prepaid services and Nexign’s best practices of project delivery and support.

# Three-Step Project Model

Nexign collaboration platform facilitates project KPIs monitoring and simplifies implementation process by dividing it into 3 consequent steps with clear objectives and deliverables.

“Nexign’s Instant BSS can help CSPs accelerate their deployment and go-to-market which is key to improving competitiveness especially in emerging markets. The Nexign Instant BSS’s open architecture and transparent implementation offer CSPs the flexibility to manage and maintain the solution in-house or externally. This adaptability, alongside the ability to adjust the solution in step with rapidly changing business environment will be an important consideration for CSPs and MVNOs”.

*John Abraham, Principal Analyst of Analysys Mason*

“CSPs are avoiding large-scale BSS transformation projects and prefer to engage with vendors on a well-defined scope of small (timeline of a few months) projects. This is the outcome of many factors such as cost, complexities and unclear future plans, as well as an increased desire to control technology change through in-house expertise”.

*Gartner. Market Guide for CSP Business Support System Solutions, October 2020*

- Rating discounts
- Unlimited usage offer
- Pre-activated kit offer
- Non-telecom products (devices, subscriptions, and cloud services)

### Solution Extension

- Support for a customer base of any size
- Open APIs for easy integration and functionality extension
- Extension to the converged platform
- Extendable service model: Nexign professional services for specific business operations

---

Nexign Instant BSS solution is designed to deliver fast business results with a lightweight billing and revenue management solution enabling a quick response to the rapidly changing market requirements. As a business grows, the solution can be transformed into a fully converged BSS platform ensuring functional scalability without escalating systems' complexity.

The open architecture and transparent implementation of Nexign Instant BSS give CSPs a flexibility to run and maintain the solution by in-house support team or local partner, or choose Nexign managed service model to focus on business development and improve operational efficiency.
